

THIS WEEK 24 - 28 AUGUST 2020

HAZARD IDENTIFICATION

Risk is the product of hazard and exposure. Thus, risk can be reduced by controlling or eliminating the hazard or by reducing workers' exposure to hazards. An assessment of risk can help leaders to understand hazards in the context of their own workplace and prioritize them for permanent control.

PMV-2 CORNERING

Motorcycles go where you point them. If you point your eyes to the rock in the road, that's exactly where your front tire is going. This was just one of many realizations that saved me in my motorcycle-riding life.

COCKPIT COMPLACENCY

I always begin this story with, "It was 100 percent my fault." Pride aside, here are the events that led to my Class D accident.

PRODUCTS & TOOLS

Learn the safety culture and climate within your organization.

A family of information technology systems that underpins the Army Safety and Occupational Health Management System.

Great resource for finding a local riding association, and learning to be a safer rider.

An interactive, easy-to-use, automated system designed to assist users with the application of risk management.

Make your Soldiers aware of the off-duty hazards they'll face with the Off-Duty Safety Awareness Presentation.

A collection of resources to aid commanders and leaders in the management of range operations and safe weapons handling.

DID YOU KNOW?

Employers have a duty to provide a safe work environment for employees. That includes compliance with OSHA rules, providing safety training and making safety a top priority – from the CEO to the newest hire. But there are things employees can also do to stay safer at work. [Click here to check it out.](#)

MISHAP BRIEFS

GMV

A Specialist assigned to Fort Drum, New York, died in a government motor vehicle mishap in Farah, Afghanistan, at 1830 local. The Soldier was operating an M-RZR on a forward operating base when the vehicle overturned and pinned him under the roll bar. The CZE medics responded and began lifesaving procedures. The Soldier was transported to a medical facility, where he was pronounced dead.

Since 2016, the Army has lost an average of 12 Soldiers a year to on-duty GMV mishaps. This mishap was the ninth on-duty GMV fatality of FY20.
