MEMORANDUM FOR RECORD

SUBJECT: Clarification of Maintenance Tasks Performed by Pilots

1. Pilots will not perform maintenance tasks on 7th Battalion aircraft that are meant to be performed by a MOS qualified individual (i.e. 15T, 15U, etc.) or ASF mechanic personnel. This includes but is not limited to MOS ICTL tasks and work packages that state it will be performed by a maintainer (i.e. PMDs, hoist inspections, etc.) They may assist but will not be the sole person performing the maintenance.
2. If an individual is a pilot in the unit and a mechanic for the ASF, they may perform the required maintenance task while in an ASF status. They will be in the appropriate uniform and pay status while doing so.
3. These are not tasks that pilots are sufficiently trained on and will not be trained on. These are typically tasks that only enlisted personnel or ASF mechanics are trained to perform and is tracked and monitored IAW TC 3-04.71.
4. The Point of Contact for this memorandum is the 7-158 GSAB Standardization Officer at 254-285-5603.
