

Instructions:

Good day Ladies/Gentlemen. This sheet is here just to provide a few brief notes regarding this product. When you have read this for a brief instructional gist of the product, I recommend deleting this sheet altogether as it will not serve any long term purpose; the product is designed to be simple to utilize, and following this brief orientation, no further reference to this sheet should be needed.

**\*\*Dashboard\*\***

On the dashboard you will notice there is a place to input the overall responsible Officer/NCO for each section. For each sub-section a responsible Officer/NCO can be input as well.

Note the BLUE type for each section. This type is used to signify that this is a hyperlink. These links will take you directly to that particular program page (also, from the program pages, there are hyperlinks that say "Return", which will take you directly back to the dashboard page).

Scoring is done per the latest guidance from FORSCOM. This product was developed utilizing feedback from the team. Scoring is as follows:

SCORING

85 - 100 Green

70 - 84 Amber

< 70 Red

Weighted Scoring is factored in.

**\*\*Program Pages\*\***

This is where the individual program data gets put in. Input Go / NoGo / N/A as applicable per the appropriate 26.1 FORSCOM ARMS Techniques Guide and the scoring will automatically take place. Note the Hyperlinks that state "FORSCOM Link" on each sheet. These links will take you directly to the FORSCOM ARMS site to download or check quarterly for new Techniques Guides. These sheets can be utilized to track sub-area surveys, and collectively, the Dashboard can record the AAPS. If you choose to print these sheets, at the top, there is a header there to record the date the survey took place for that individual program; on the Dashboard sheet there is a header to note the date that the AAPS was completed. If you have any questions or feedback do not hesitate to reach out to me at [brian.d.friend.mil@mail.mil](mailto:brian.d.friend.mil@mail.mil) or by clicking anywhere on this instruction button.

-Best regards, CW3 Brian Friend

Version 26.1 \*\*\* **FEATURES** \*\*\*

- Summary Slide - for briefing overview only.
- Portrait Dashboard - gives an additional printing option, and viewing option (right click any sheet and select the "unhide" option and it will appear).
- ATS Tactical Section.
- FAQ's page.

## FAQs:

**Q: How does the scoring work / I believe the tracker is calculating incorrectly.**

A: The way the weights are calculated are not as weights are traditionally calculated like some may be used to seeing. Weights only apply whenever a question is missed. For example, consider the following scenarios: if a section has 3 questions and all three questions are scored as Go's, this is calculated as 3 out of 3. If one of the three questions is weighted 2 and this weighted question is missed, the score would then be 2 out of 4. If, however, one of the NON-weighted questions were missed, but the other two (non-weighted and weighted 2) questions were both a Go, the score would be calculated as 2 out of 3. If a question is scored as N/A, the question is completely removed from the scoring equation. If a Critical question is missed, the entire section, e.g. Maintenance, is Red.

**Q: Why are the weights applied this way?**

A: When the scoring scheme of this product was programmed, it was done after first consulting the FORSCOM ARMS team regarding the scoring methodology. The information given concerning the weights and critical questions was then built in to the calculations as received.

**Q: I am in an OSAA / UAS Unit, can I use this tracker?**

A: Yes. There is an option for "N/A" questions. Mark all questions not applicable to your checklist as N/A and the calculations will take place appropriately. If you belong to one of these units and find that this program is missing a needed capability, please write to me and let me know.

**Q: My Organization gets evaluated using the ATSCOM Installation Techniques Guide, can I use this tracker?**

A: No. I have developed a sheet for the ATSCOM Guide, however, it is not incorporated on this Dashboard. If you are graded on the ATSCOM Techniques Guide and would like the dedicated Excel sheet for this, please contact me direct.

**Q: Can an amber option be programmed in for answer results having a status seemingly between a Go and NoGo?**

A: The technical answer is yes, the functional answer is no, if the product is to be kept to its original design intent. The design intent of this program is/was to match the grading and scoring scheme of FORSCOM. As such, one may utilize discretion as done with the FORSCOM usage of the SAT with Comment. If during an AAPS one has an evaluated question that seems to fall into a "between", two options would exist for the evaluator/surveyor. Either the question gets marked as a Go and notes are taken next to it indicating the caveat (similar to a SAT with Comment), -OR- a NoGo can be assigned until the situation is fixed without exception; the latter being more conservative is recommended.

**Q: Are there any unlocked copies of the program?**

A: There are no unlocked copies in circulation. Distributing only locked copies keeps everyone's tool operational, and keeps there from being multiple programmer's work behind the product when troubleshooting and/or updating is required. This also serves the purpose of allowing problems identified to be fixed and then re-distributed with improvements to the greater Aviation community. Updates are published as needed and with each new release of the Techniques Guides, and are made available via the ASO ListServer and/or FORSCOM.

**Q: I have some suggestions / feedback / or a unique need for the product, can this be accommodated?**

A: Please send any suggestions, feedback, or communications if you have a unique need for the product. I will do my best to accommodate the request and support you. In several cases I have found that these discussions have led to product
