

THIS WEEK 19-23 APRIL 2021

DRIVER TRAINING

Improper Soldier training and licensing is often overlooked until there is a mishap. Army vehicles are growing increasingly complex, and leaders have the express responsibility to ensure we have done everything possible to train our Soldiers to standard before issuing a license.

WHAT'S NEW?

With temperatures on the rise and pandemic-related restrictions lifting across the U.S., many Soldiers and their families will be enjoying recreational activities within their local areas and planning vacations. Summer, however, is the Army's deadliest time of year for mishaps, so playing it safe is critical to having a good time. Click here to access the USACRC's Summer Safety 2021 content.

SAFETY SHORTCUTS

The unit had 10 aircraft and flew them constantly as part of exercises or missions, so we were very busy. Because of that, we started taking shortcuts and ignoring some safety measures we were supposed to check before work started.

PLAN FOR THE HEAT

Spring is already here and summer is fast approaching, so leaders and Soldiers should be considering hot weather hazards. Heat illnesses degrade mission effectiveness and can happen during any month, but most occur between June and July.
